LOGGED

MEMORANDUM FOR: Director of Information Technology

25X1 FROM:

Director of Communications

25X1 SUBJECT: Clarification of Responsibilities Between OIT
and OC

1. Upon the formation of OIT in 1984, a number of programs and activities formerly managed by the Engineering Division, OC were transferred to OIT. OC-ED continued to retain responsibility for providing engineering support to OIT on certain domestic communications programs, including the Headquarters Area Transmission System (HATS). At that time, responsibility for overall system management, requirements collection, and liaison of the various domestic wideband services appears to have been overlooked.

25X1
25X1

3. With this lull in activity, we believe it is now opportune for OIT to assume responsibility for overall management of WAWS, and any other present or future domestic wideband networks, including all relationships with customers (i.e., NPIC, DIA, etc.) and providers (i.e., DCA, common carriers, etc.) of service. OC will continue to provide engineering services as required by OIT for development and implementation of new transmission equipment.
